

The Ideal Ventilation Solution...

Reduces cooling bills by minimizing the heat load on your air conditioning equipment

Lowers attic temperature, resulting in a more comfortable home

Prevents mold and humidity in the attic by actively removing moisture build up

Works hardest when you need it the most, operating faster when the sun is more intense

Operates completely cost free using only the power of the sun

...From the Best in the Industry

Attic Breeze solar attic fans are unmatched in quality and performance. Our proprietary UltraFlō™ design technology maximizes airflow production, offering the highest conversion efficiency (cfm/watt) of any solar powered ventilation product available.

Power	Performance	Coverage Area*
20 watts	1350 cfm	up to 2100 sqft
25 watts	1550 cfm	up to 2500 sqft
40 watts	1800 cfm	up to 2900 sqft
60 watts	2050 cfm	up to 3300 sqft

* Proper sizing depends on a variety of factors including roof pitch, attic area, architecture, roof color, as well as the specific ventilation application. Please visit our website for more information or contact your local Attic Breeze dealer for assistance.

LIFETIME WARRANTY

Attic Breeze solar powered ventilation products are engineered to withstand harsh weather conditions and offer decades of durability. Performance tested to intense wind load pressures, our solar attic fans are rated for hurricane force winds of over 170 MPH* and designed to endure the most extreme conditions on the planet. We stand behind the quality and workmanship of our products by offering the best available warranty in the industry. When quality and performance matter, the clear choice is Attic Breeze.

* Refer to your local building code for specific wind load requirements in your area. Tested and certified for Florida Building Code and Texas Windstorm (TDI) product approval standards.

Attic Breeze

Let Your Attic Breathe

Allowing your attic to breathe is an important aspect of maintaining a healthy, energy efficient home. Without proper ventilation, radiant heat and moisture work together to cause a variety of problems, resulting in higher energy bills, mold outbreaks, and the deterioration of your home over time. Attic Breeze solar attic fans provide an effective solution to proper attic ventilation by continuously removing heat and moisture buildup throughout the day, resulting in a more comfortable home which requires less energy to cool. With models available for virtually every application, Attic Breeze has your solar powered ventilation solution.

"I wish I had installed my Attic Breeze solar attic fan years ago... my home feels much cooler now and the savings on my summer electric bills are simply amazing!"

- Mark G. Denver, CO

"We love our Attic Breeze fan! Prior to installing, our attic was over 140°F. Now it's only 103°F on a 99°F day. Thanks for making a great product!"

- Ian B. San Diego, CA

If your attic could talk...

It would ask for relief from the choking heat and lack of ventilation. The heat buildup resulting from trapped attic air has a direct impact on your electric bills, as well as the performance and unit life of your A/C system. Listen to your attic and help your attic breathe. Install an Attic Breeze solar attic fan today and start reaping the benefits of better ventilation and a more comfortable home. Your attic will thank you.

PRODUCT FEATURES

- ▶ Corrosion resistant zincalume alloy construction with stainless steel hardware and brackets
- ▶ High-efficiency impact resistant monocrystalline solar panels
- ▶ Available in 20, 25, 40, and 60 watt models for both residential and commercial applications
- ▶ Heavy duty powder coated finish, available in black, brown, gray, white, or terra cotta
- ▶ Both Florida and Texas windstorm approved for hurricane force winds
- ▶ *UltraFlō™* design technology offering maximum airflow performance
- ▶ Dynamically balanced 14" aluminum fan blade for whisper quiet operation
- ▶ Thermal switches included standard on residential models at no cost
- ▶ The most options and accessories available from any manufacturer
- ▶ Proudly made in the USA

Features adjustable temperature and humidity control

Integrated fusible link safety switch included

Displays power output and fan operation

Prevents attic depressurization using patent pending pressure sensing technology

Wirelessly controls up to 10 solar fans

Innovations in Ventilation Technology

The Breeze Mate™ Solar Ventilation System combines our award winning *UltraFlō™* ventilation technology and proprietary control system design to give you the most intelligent solar powered ventilation solution ever created. Breeze Mate™ puts ventilation control in your hands, allowing full control over fan operation, as well as many safety and performance related features. To learn more, please visit our website or contact your local Attic Breeze dealer for details.
